

HASEEB UR REHMAN

Software Engineer — Full-Stack (MERN)

+92 319 7810023 | haseebrehman3460@gmail.com | linkedin.com/in/haseebrehmanweb | github.com/HasebRehman

PROFESSIONAL SUMMARY

Full-stack Software Engineer with 3+ years experience across the MERN ecosystem (React.js, Next.js, Node.js, Express.js/NestJS, MongoDB, PostgreSQL). Takes full ownership of features end-to-end from database schema design and REST API development to responsive UI implementation and deployment. Utilizes AI coding tools (Claude, Cursor, Codex, Antigravity) daily to ship faster and cleaner code. Currently a Senior Web Developer at Digitsio Marketing, building on prior full-stack experience at Cure Logics, while independently building and shipping full-stack products. Fast learner and proactive collaborator; BSc Computer Science (NUML, CGPA 3.63/4.00).

TECHNICAL SKILLS

Frontend: React.js, Next.js, JavaScript (ES6+), TypeScript, HTML5, CSS3, Responsive UI

Backend: Node.js, Express.js, NestJS, RESTful API Design & Integration

Databases: MongoDB, PostgreSQL, Supabase

Auth & Security: JWT, OAuth, Role-Based Access Control

AI-Assisted Development: Claude, Cursor, Codex, Antigravity — used daily across the workflow

Tools & DevOps: Git, GitHub, Docker, Vercel, Railway, Hostinger, IONOS

WORK EXPERIENCE

Senior Web Developer — Digitsio Marketing

August 2026 – Present

- Lead full-stack web development for client and in-house projects, taking ownership of features from architecture through deployment.
- Utilize AI coding tools (Claude, Cursor) daily to accelerate development, debugging, and code quality.
- Collaborate with the wider team on technical decisions, code reviews, and delivery timelines.

Junior Web Developer — Cure Logics

Jul 2025 – Jul 2026

- Built and shipped full-stack features end-to-end using React.js, Next.js, and NestJS in a fast-paced production environment.
- Designed and integrated RESTful APIs against PostgreSQL and Supabase, achieving improved query response times and enhanced data reliability across core modules.
- Refactored code into type-safe TypeScript and applied performance techniques (lazy loading, code splitting) to speed up page loads.
- Participated in code reviews, debugging, and technical documentation using Git-based workflows.

KEY PROJECTS

Lizt — Smart Event & Task Organiser — JavaScript, Node.js, Supabase

- Built a full-featured collaborative event management web app (lizt.app) with real-time task checklists, cost tracking, shared file storage, and team messaging.
- Utilized a NoSQL-backed data layer for real-time database sync, authentication, and file storage.

Veylohr — HR Management Platform — React, TypeScript, Express, PostgreSQL

- Built REST API modules and designed normalised database schemas for a production HR SaaS platform covering employee records, attendance, and payroll workflows.
- Implemented JWT authentication and role-based access control.

E-Commerce Platform — Node.js, Next.js, TypeScript, NestJS, Supabase

- Architected a full-stack e-commerce application with product catalog, cart management, and a complete checkout flow, deployed to production.

EDUCATION

Bachelor of Science in Computer Science

2021 – June 2025

National University of Modern Languages (NUML), Lahore · CGPA: 3.63 / 4.00
